

Learn More About Playing Up With Tiles!

Beautifully planned and designed bathroom facilitates beautification not only to your home but also offers you an elegant bath too. In case, you are trying to bring magic makeover to your dream bathroom, first and foremost thing is to satisfy yourself by purchasing the latest and the best designer tiles which can add attractiveness to the overall bathroom while making it appear amazing.

After selecting the best designer tiles for your bathroom, if you wish to install tiles on your own, then you can seek the assistance of a variety of tile saws that can be obtained through various leading stores, helping you in perfect cutting of tiles thereby giving a new look to your bathroom. These are easily available in different leading stores MK Diamond, QEP, Edco, Felker and Nattco, wing, the names of Felker TM 75, MK Diamond 370 and Felker FTS 150 and few others truly fits your criteria. Every tile saw machines are ‘Do it yourself’ technique and help you in effortless tile cutting facilities with greater ease.

Felker TM 75 is an extremely portable saw that comes with a blade capacity of 8” and cutting depth of 1.5 / 8” and supports large grooves for precision cut. Some of the primary features of Felker TM 75 include self cleaning rollers, ¾ HP motor, blade speed of 3300 RPM, marked ruler, ABS polymer light weight model and easy to clean water pan.

MK Diamond 370 EXP 1 and MK Diamond 370 ½ HP comes under the head of MK Diamond 370. MK Diamond 370 EXP 1 is fitted with wet cutting tile saw of 1.1/4 HP with features like blade capacity of 7” and cutting depth of 2”, heavy duty switch, adjustable cutting head, engine with 1.1 / 4 HP and 120 Torque motor. On the other end, MK Diamond 370 ½ HP with 7” blade capacity, cutting depth of 2” and compact table top designing is perfect to use and handle.

Felker FTS 150 comes with motor torque of 1.1 / 2” HP, heavy blade capacity of 6” to 10 with 90 degree blade guard and conveyor cart to discard the drain water.

So, in case you are making attempts to fix the bathroom tiles on your own, get started with the tile saw but there are some prerequisites to be done before starting with tile sawing. The first and foremost step is to close the toilet valve and disconnect the water supply so that the bathroom remains dry.

Second step is to take away the old linoleum and flooring. Be convinced and certain regarding the smoothness of the surface and its cleanliness. Now, visualize the area where you wish to fix the tiles and decide on its fixed location. To get started with fixing of tiles, arrange some mortar for speedy settling. Once the mortar starts settling, place the tile carefully along the border.

You can always cut them off uneven sides with a nipper and grind their rough edges with the help of a saw blade. This will allow the perfect astonishing appearance to your bathroom and a stylish look to the tiles. So, build up a bit of your imagination and start working on tile sawing with designer tiles to bring a new and complete different makeover to your bathroom and starts gathering appraisal from others for the same.
